

IT Consultant

Summary

We require a pro-active IT Consultant capable of delivering outcome based projects. The consultant must have very strong architecture and implementation technical skills together with an aptitude for communication and understanding underlying business drivers. Quickly assimilating new technologies, being able to apply what is learnt and showing a genuine enthusiasm for the technology are critical to this position's success.

Key Personal Attributes and Skills

- Must be personally proactive and with customers
- Learn quickly
- Have a genuine enthusiasm for technology and a desire to maintain current with technology trends
- Great interpersonal skills
- Willingness to travel
- Dependable and trustworthy

Technical Skills

This role has a focus on Microsoft infrastructure and related technologies.

Required areas of **high proficiency**:

- Systems design, implementation and migration
- IP services
- Microsoft Windows Server
- Microsoft Windows client operating systems
- Active Directory and Microsoft networking in general
- AD Group Policies and client policy best practices
- Microsoft System Center Configuration Manager (SCCM)
- Windows 10 deployment technologies (MDT, WDS)
- PowerShell

Plus, high proficiency in **at least two** of the following areas:

- Microsoft Azure IaaS, PaaS and SaaS
- Office 365
- Authentication federation (ADFS)
- SQL Server (DBA)

Other demonstrable skills:

- On the Microsoft accreditation track
- Experience of project delivery, preferably as part of an IT services company

About Us

We are a dynamic IT consultancy focussing on the Microsoft infrastructure technologies. We specialise in whole lifecycle projects where the quality of delivery and customer satisfaction are critical. As such, our employees have a large degree of control and responsibility over their project work and the customer relationship. We pride ourselves on being technology evangelists to our customers whilst understanding the business drivers, outcomes and impacts of the technologies we implement.

£40K to £50K package, dependent on applicant, which includes a performance-related bonus scheme.
